

Innovative, Safe, and Cost-Effective Why Rope Access is the Corporate Choice for Trade-Based Services

We provide cost-effective access solutions for a variety of safe, practical works using advanced rope access methods. Our approach ensures rapid and secure entry to hard-to-reach areas, minimising downtime and disruption.

Our Key Services

IRATA Twin Rope Access

Comprehensive support for construction, shutdowns, maintenance and asset services

Welding & Mechanical Capabilities at Height

Minor repairs to structural welds in hard to access locations. Servicing, installation and maintenance of equipment at height

Industrial Coatings & Inspections

INDT and integrity inspections along with repairs and applications of coatings to preserve asset integrity

Complex Rigging Operations

Installation of temporary & permanent rigging. Load shifting solutions for piping, valves, and other critical equipment

Emergency Hazard Mitigation

Addressing damaged equipment, process piping leaks, roof repair, and dropped object inspections.

Embankment Access

Specialised services for inspections, concrete remediation, debris clearing, and scaling on walls, dams, and cliffs.

Height Safety Management

Setup of temporary fall arrest systems, height rescue services, and anchor point installations.

Confined Space Services

Entry and standby rescue support for vessels, heat exchangers, tanks, pipes, and pits, including operations under breathing apparatus.

Benefits

Quick Access: Reach difficult areas fast.

Safe Methods: High-standard safety measures.

Reduced Costs: Less reliance on scaffolding and cranes.
